

Science Lab Technician

Role Description

Purpose of the role:

Cambridge International School (CIS) in Bratislava, Slovakia, is seeking to appoint a Science Lab Technician to join our team to take on the role of lab technician in a busy Science department to support the organisation of practical work for students.

Duties and responsibilities:

- Provides direct technical support to the teaching and learning of science-based subjects, carrying out risk assessment as appropriate.
- Prepares apparatus, materials and solutions as directed by the head of the Science department.
- Sets up, checks and issues equipment and apparatus for use in practical lessons.
- Carries out and arranges for the maintenance and repair of apparatus and equipment.
- Checks deliveries and re-orders essential items as necessary.
- Manages the inventory and account for losses.
- Ensures an up-to-date chemical database is at disposal at School.

Requirements:

- Secondary school or University degree specialised education in Chemistry/Biology.
- Previous experience in working in a laboratory or as a medical technician is highly preferred.
- Highly organised and methodical person with a genuine enthusiasm for science and the teaching of science.
- Clear understanding of lab safety.
- Excellent interpersonal and communication skills both in English and Slovak language.
- High level of accountability and reliability.

We offer:

- Excellent working environment and conditions in a friendly team and highly progressive school.
- Future career progression in a highly successful and growing educational group.
- Employee professional development (trainings, courses, conferences etc. paid by CIS)
- Multisport card.
- Healthy and highly subsidized lunches in school canteen.
