

THE SCHOOL

Cambridge International School was founded in 2012 and is fully accredited by the Slovak Ministry of Education to deliver the Slovak National Curriculum alongside the English National Curriculum leading to Cambridge (CAIE) IGCSE and International A-Level qualifications in the four years of Upper Secondary (High School).

Our families come from all corners of the globe. We also recruit teachers from all over the world bringing a wealth of international experience. All are fully qualified subject specialists and highly experienced educators.

Cambridge International School has assisted in securing places for its graduating students in top universities all over the world.

Since 2012, the School has grown from a single class to a renowned and respected centre for learning with over 520 students representing over 25 nationalities. It has however retained the warmth and family atmosphere to express that we are more than just a school, we are a proud and supportive learning community.

EXPLANATION OF THE GRADING SYSTEM OF A-LEVELS

A-Level stands for Advanced Level and AS Level stands for Advanced Subsidiary Level. An AS Level contains half the content of the corresponding A Level and is normally completed in one year whilst a full A-Level requires two years.

A-Level examinations are usually taken after 13 years of education (12 at Cambridge International School) and are based on approximately 360 hours of guided learning per subject over a two year period. The Cambridge (CAIE) International A-Level is reported on a grade scale from A* (highest) to E (minimum Requirement to pass). There is no A* grade for Cambridge (CAIE) International AS Levels, which are awarded from grade A to E.

All examinations are set, marked and moderated externally under the oversight of Cambridge Assessment International Education, a department of the University of Cambridge in the United Kingdom.

A-levels are highly specialised and a student will normally take three subjects, although occasionally exceptional students can take four or five. They are a 'gold standard' of international education, and act as entry qualifications for universities across the globe. They are considered equivalent to the level of first year undergraduate study in many universities.
